Upgraded Handheld Pneumatic Strapping Machine

SSTC- B 19 PET Plastic Strapping Tool

Introduction of Strapping Machine :

Hand Portable Strapping Machine is the full automatic tool for PET or PP strap strapping. Hand Portable Pneumatic Plastic Strapping Machine can combine the new and old straps directly and save the time of wearing and work load. They are suitable for the packing of the steel, timber, brick, fiber and so on

Application: Pallets, cotton bales, crates, cases, various packages.

Features of PP PET Automatic Plastic Strapping Machine :

- 1, Suitable for all kinds of PET plastic strap
- 2, Hand tighten, seal notch, cut, easy to operate
- 3, Simple structure, low failure rate
- 4, The most suitable for small objects in packing
- 5, It is portable, inexpensive, suitable for hard working conditions, the quality requirement for production workers is low.
- 6, Using spin to tighten the way, to achieve greater tighten force.
- 7, The simple package for heavy goods
