About Us

Octanics Software is all-in-one software platform for small to large businesses. We empower entrepreneurs/owners around the world to start and grow their businesses with our smart software technology, and inspiring technology.

Founded by us, headquartered in Ahmedabad with additional offices in Mumbai and Sydney, Australia.

Every day we focus in providing better functions to improved business through our customized and flexible software.

In order to do this and make sure that our software is a great alternative to other present software.

A Software Development Company that aims at perfect branding & fortifying reputation with unique digital services. We believe in delivering comprehensive services, agile web solutions and proper integration with the existing systems.

We deliver solutions that improve enterprises' productivity and strengthen their relationships with customers.

Trust our top minds to eliminate workflow pain points, implement new software structure and consolidate company's portfolio.

Delivering what is required within the committed time-frame and following a transparent costing along with the scope of customization is what makes us the best in our services.

Through an elite team of courteous and responsive professionals, our mission is to deliver an unrivalled service experience.

We are committed to building long-term relationships with our clients. We are partners for a better future.

About Us

We are an "Intelligent Decision Enabler" company that uses decision sciences. They improve productivity for functional departments including Sales, CRM, HR, Supply Chain Management and Virtual CEO. Our offering also includes customized products and consulting services.

We combine the power of management consulting and software to help customers improve traction and growth and profitability.

Octanics is now on an ambitious quest to move past being a customized tech company and become a decision software company.

So, why work hard when you can work smart?

Ask yourself

- Will your company operations run just as smoothly if employees or you are absent in your business?
- Do you want to own a business or just want to manage and look after your employees all the time?
- Can you carry your business on your mobile phone?

For this you need a customized software product that takes care of the complicated stuff and managing all work so you can focus on your job.

Introducing TurboBusiness - A product developed by Octanics is your best guide to tracking and growing your business.

Our Products

TurboBusiness enables data transformation into decision making for the era of an intelligent edge. Its mission is to empower every person and every organization on the planet to achieve more. TurboBusiness offers its global services from start-ups, businesses, and government agencies.

Here are some benefits

It's an intelligent software for Business

We believe the key to realizing the vision for business growth has software as its core. We partner with CEO's to develop best software-tech solutions to digitally transform every sector globally. We have our three offices globally which provides inclusive growth and accelerate transformation.

Digital Transformation for Business

We help business reimagine how they bring together people, data and processes to create value for their customers and maintain a competitive advantage in a digital-first world.

Trust and Security

All processes are defined clearly and are followed throughout your organizations. All actions and data are tracked and monitored on cloud.

Our Products

Ease of Use

TurboBusiness is great to use and simple too. We also have extensive help files built into the programs if you get stuck.

Online Tutorials

Besides the help that you get from Octanics software, there are other tutorials devoted to help.

Functionality

TurboBusiness is used for practically all corporation level applications. Thus, TurboBusiness can help you dominate your operations and profitability monitoring in the industry.

For every minute spent on TurboBusiness you get

- 5X time saved
- 5X reduction of complexity
